What's New In?

Developers IDE - an IDE for the Win32 enviroment that includes compiler code generators for Win32 and DOS based apps. Includes the following features :

- * Exports class and Win32 control files (.ctl and.h) by converting the source code for your app.
- * Supports free DOS-based compilers for building Win32/Dos apps.
- * CITESThe C and C++ Compilers for DOS include DOS system libraries which uses a lot of memory, so to reduce memory usage in Developers IDE, it does not uses the older -O1 optimization which is overloading DOS startup with memory requests.
- * Uses CITES2 for DOS (www.cites.org.uk) instead of DOSDJGPP for DOS!
- DOSDJGPP is only 1.02 and only for DOS apps, it does not support .exe and .com, and it has a poor output. Developers IDE supports .exe, .com and DOSDJGPP 1.02.
- * Supports both DOS and Win32 (32 or 64-bit) applications
- * Supports DOS and Win32 GUI applications
- * Supports a wide range of target processor types and operating systems. Developers IDE and its DOS DJGPP based C and C++ Compilers are cross platform (Windows, Mac OS, Linux).
