Laparoscopic cholecystectomy (LC) is the preferred technique for the removal of symptomatic gallstones. Additional surgical approach is warranted if intraoperative choledocholithiasis (IOC) is detected by intraoperative cholangiography (IOC). Although the impact of IOC on the recurrence rate of gallstones after LC is controversial, many surgeons advocate the conversion of emergent LC (clamshell LC) to open cholecystectomy in patients with IOC. However, the risk of IOC during LC, the appropriate surgical approach for those patients, and the impact of IOC on the recurrence rate of gallstones after LC remains unclear. Of the 1,204 patients who underwent LC during a 22-month period at our institution, 72 patients with IOC (5.3%) were identified. These patients were retrospectively reviewed to evaluate the incidence of IOC, the therapeutic strategy, and the impact of IOC on the recurrence rate of gallstones after LC. IOC was associated with severe concomitant diseases in 40% of patients. Twenty-three patients with IOC were converted to open cholecystectomy. Among the 23 IOC patients, the operative period was relatively short (mean time, 4.1+/-3.2 days) and the duration of IOC (mean time, 2.6+/-2.1 days) was shorter than that of the patients without IOC. The incidence of IOC in the patients with preoperative cholangiography was 4.4% (5 of 117 patients), which was similar to the incidence of IOC in the patients without preoperative cholangiography (3.6% of 1,077 patients). In contrast, the incidence of IOC in the patients with preoperative ultrasonography was much lower (1.8% of 312 patients). Two patients with IOC (9.5%)

EPUBA .Last night the future of the Star Wars live-action television show came into question when Disney CEO Bob Iger told us that a Star Wars show cannot be made without the permission of George Lucas. This announcement has been seen as a death knell for the series. Iger said, "There are a few things that we don't announce until we are ready to do them, but I can tell you without hesitation, Star Wars, Lucasfilm and Disney are in a position to move forward with our television and digital projects, but we are not going to move forward with anything without the creator's permission." But Disney is not the only movie company interested in bringing a Star Wars television show to life. At the recent fan convention Celebration V, it 6d1f23a050
